PERRY ELIZABETH WONG COSTA

DEVELOPER, WEB & GRAPHIC DESIGNER

BIOGRAPHY

I'm 20 years old, and currently in my 4th year at University of California, Davis with current standing as the first and only Human Computer Interactions Major. After petitioning to bring the major to Davis so I could combine my love for programming, interactive media and art, I've since paved the pathway for students who share similar interests. Since then, I've held jobs focused on freelance web and app development with a close group of peers in several start up platforms, and am currently the head UX/UI developer at BLINK-Global Livestream, the founder of the Girl Code Academy of Applied Computer Sciences and the co-founder of Daughters of Paradise.
